Research Interests

Robot Learning
Vision-Language-Action Models (VLA), Embodied Reasoning, Hierarchical Policy, Long-Horizon / Mobile / Dexterous Manipulation

Education

MS in Computer Science, **Yonsei University**, Seoul, Korea — Sep 2023 - Aug 2025
Advisor: Prof. Seon Joo Kim

BS in Computer Science, **Yonsei University**, Seoul, Korea — Mar 2017 - Aug 2023
Undergraduate Research Assistant in **CIPLAB**

Experience

Real World Inc. (RLWRLD), Seoul, Korea — Jun 2025 - Present
Research Engineer

- Joined as one of the first research engineers; built the initial robot learning pipeline end to end, from data collection through training to real-robot inference
- Designed the real-time inference logic for policy deployment, improving the quality and reliability of live demos
- Core contributor to **RLDX-1**, the company's robot foundation model
- Developed a hierarchical policy system that adds memory on top of the low-level policy, extending the system toward long-horizon manipulation tasks

Publications
(* Indicates equal contribution)

Jinho Jeong*, Se June Joo*, **Jaehyun Kang**, Dongyun Kim, Yena Kim, Hanjung Kim, Seon Joo Kim, "HuRo: Robotizing Human Videos for Scalable VLA Pretraining". ***Under Review***. 2026.

Dongyoung Kim, et al. (incl. **Jaehyun Kang**, core contributor), "RLDX-1 Technical Report". ***arXiv:2605.03269***. 2026.

Hanjung Kim*, **Jaehyun Kang***, Hyolim Kang, Meedeum Cho, Seon Joo Kim, Youngwoon Lee, "UniSkill: Imitating Human Videos via Cross-Embodiment Skill Representations". In ***CoRL***. 2025.

Jinwoo Kim, Janghyuk Choi, **Jaehyun Kang**, Changyeon Lee, Ho-Jin Choi, Seon Joo Kim, "Towards Interpretable Controllability in Object-Centric Learning". In ***CVPRW***. 2024.

Hyeonhoon Lee, **Jaehyun Kang**, Jonghyeon Yeo, "Medical Specialty Recommendations by an Artificial Intelligence Chatbot on a Smartphone: Development and Deployment". In ***JMIR***. 2021.

Awards and Honors

CVPR ScanNet++ Workshop Challenge — Jun 2024
3rd Place

- Semantic segmentation on ScanNet++ 3D point cloud data
- Fused 2D CLIP features with 3D point cloud features

AI Innovation Challenge — Aug 2023
Minister of Science and ICT Award (1st Place)

- Semantic segmentation of satellite images

Yonsei Academic Excellence Award Mar 2023
Top Academic Achievement Award
- Recognized for outstanding academic performance (high GPA)

Software Capstone Design Dec 2022
Grand Award

National Defense Open-Source Hackathon Oct 2020 - Nov 2020
Minister of National Defense Award
- Developed chatbot recommending medical specialties for military patients

Teaching Experience

Yonsei University, Seoul, Korea
- TA of Robot Learning (Spring 2025)
- TA of Introduction to AI and its application (Fall 2023, Fall 2024)

Extra curriculars

Naver BoostCamp AI Tech Aug 2021 - Dec 2021
YAI (Yonsei Artificial Intelligence) Jul 2021 - Sep 2022
Morgorithm (Yonsei CS Algorithm Club) Sep 2017 - Dec 2018
